

# Single Cell Coil User Manual

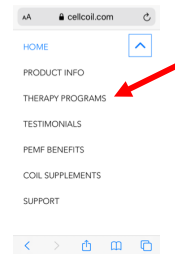

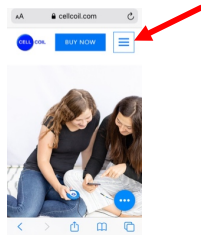

These instructions refer to the use of the coil with a cell phone but any mobile device (tablet, laptop, etc.) may be used.

## Getting Started

1. Remove the coil and cable from the box and remove the plastic bag on the cable.
2. If your cell phone does not have a circular audio jack, an audio adaptor must be purchased and connected to the cell phone.
3. Insert the cable connector into the audio jack on the cell phone or the audio adaptor.

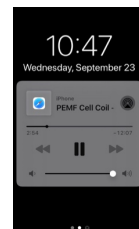

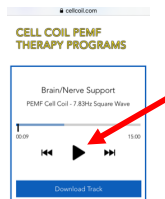

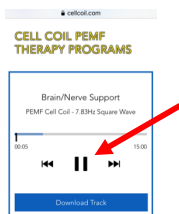

4. Scan this QR code with the cell phone camera to go the Therapy Programs or follow steps 5 and 6.
5. Open your web browser and type in [cellcoil.com](http://cellcoil.com) and touch the MENU icon.
6. Touch the THERAPY PROGRAMS option.
7. Choose the program you want and press the PLAY button.

8. Turn the volume up to 100%.
9. To pause or stop the therapy press the PAUSE button.
10. To start the therapy again press the PLAY button.
11. The therapy will continue to play even when the screen is off.

The audio therapy will start to play and the coil will radiate a magnetic field at the specified frequency.

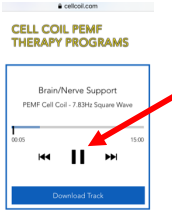

12. Place the coil on the area to be treated and hold it until the therapy is done, or use the strap to hold the coil in place (see the following steps).
13. Unwind the strap. The strap may be cut to a convenient length and reconnected at a later time.
14. Attach the strap to the Velcro strip on the cover to hold it in place until the therapy is finished.

## When The Therapy Is Finished

1. Stop the therapy by touching the Cell Coil icon and pressing the PAUSE button.
2. Remove the coil and strap from the area being treated.
3. Remove the coil cable connector from your phone.

## Support

Scan this QR code with the cell phone camera to view a video about how to use the cell coil.
